

More Than 9 Tonnes of Torque

Yanmar 4LHA-DTP 190mhp-146kW

- Envious power and torque output
- Outstanding power-to-weight performance
- Low noise, low vibration and typical Yanmar reliability
- Class leading fuel economy

The Powerful Gem

Superior Technology

Punching over 9 tonnes of Brava 42 cat hull onto the plane is a tough task that few diesel engines can accommodate as effortlessly as Yanmar.

Brava Marine specified the Yanmar 4LHA-DTP marine diesel engine due to the unrivalled combination of exceptional torque, superior power to weight attributes and Yanmar's legendary miserly fuel consumption. Add in whisper quiet operation with smoke free performance ... classic Yanmar attributes.

The key appeal is the industry leading torque developed by the 4LHA-DTP. This 4 cylinder powerhouse delivers torque by the boat load all the way through the powerband to get the Brava 42 up and running.

And at the optimum cruise speed of 18 knots, the fuel consumption of just 22 litres per engine per hour allows boaters to cruise all day long... without a care in the world.
