I Cut My Fuel Consumption by 40%

Owen Grassby is one very satisfied Yanmar diesel owner.

The Lakes Entrance based pro fisherman repowered his shark fishing boat with a new 350 mhp Yanmar 6HA2 marine diesel. He has since recorded a stunning result in fuel economy and overall boat performance.

“The Yanmar 6HA2-HTE is over 2 tonne lighter than the engine I removed. And now the boat is 10% faster but most importantly, I’ve cut my fuel consumption by 40%.”

“The fuel burn with my Yanmar is now only 12 litres per hour. It used to be a whopping 20 litres an hour with my old 24 litre diesel engine.”

“I have done over 1500 hours in my first year I am won over by the Yanmar’s fuel economy and the lack of any oil leaks.”
